Men's Hot Rod 108

Connecting Rods, Pistons, & TDC

Hey guys, tonight we are going to talk about Connecting Rods, Pistons, and TDC (Top Dead Center). So let's dig right in. The Connecting Rods connect the pistons to the crank. The crank is designed in a timed manner according to when each piston should be at TDC. As the crank turns it puts each piston in the right place at the right time for combustion. It can't do this without the Connecting Rods.

Now here's the situation; How are you connected to God and how is your connection with people. God wants all of mankind to be in the right place at the right time, (In His will) when the end comes. God, unlike the crank, can do anything He wants, but He chooses to use His children to preach the good news, the gospel of Jesus Christ to the world. As we learned last Friday Jesus is the only Mediator between God and man however, God uses His children to plant the seed of salvation in people and also to water that seed. He also uses His children to comfort and strengthen people. This takes you having a good connection with God and having a good connection with people.
